

Atlantic Safety CENTRE newsletter

february 2016

Message from our CEO William P. Hogan

Atlantic Safety Centre (ASC) was established in 1995 and then opened for business in 1996. Twenty years ago, my vision was for ASC to be representative of a true centre of excellence in Occupational Health, Safety, Wellness and Industrial Security. This newly established company would benefit not only from my personal experience in this field, but also from the wealth of knowledge brought forth by a team of professional managers and senior staff who demonstrated exceptional dedication and work ethic. They understood then, as they do today, that there is no compromise when it comes to safety in the workplace.

Throughout these two decades, there were many economically challenging times within our province. As ASC grew, we focused on the quality of the safety and security services that we were providing to our clients. The businesses, within our province, were our primary customers and they were coming to the realization that investment in sound safe work practices for all workplace stakeholders minimizes loss and maximizes efficiencies and return on investment. Today ASC is a company on the move which strives to build on established practise and works to find new ideas to make the company better. We have adapted to the changing and growing needs of the workplace while recruiting young safety professionals to carry our vision to workplaces throughout our great province and country.

On this 20th Anniversary of ASC, I would like to take this opportunity to acknowledge and thank our dedicated staff here at Atlantic Safety Centre. The employees at ASC continue to be an inspiring example of what can be accomplished with a strong team and disciplined management. They are living proof that a company's success is due to team and leadership effort. Each and every one of them represents the ideals of dedication and hard work which we have been bringing to businesses within and outside our province for the last 20 years.

ATLANTIC SAFETY CENTRE

celebrating 20 years of teamwork in safety and security

Strong companies are the product of strong teams. That is the key to our continuing success here at ASC over the past 20 years. Our team's knowledge and expertise is broad and unmatched: from safety training, compliance and consulting to industrial security solutions.

Mike Gear

As ASC's Site Security Supervisor, Mike is the lead security professional in large scale industrial operations such as Bull Arm, Voisey's Bay, and Argentia. His background includes security inspection, staff supervision, law enforcement liaison, and instructing others on quality specifications and requirements.

Mona Saunders

At the helm of ASC's operations for the last 20 years, President Mona Saunders embodies the company's deep roots in safety in Newfoundland and Labrador. Mona has been with the company since its inception and it is due to her strong and experienced leadership that ASC continues to provide quality service through the facilitation of our training services and the provision of professional advice to our many valued clients.
